Loving Our Music Heritage
Sound-controlled & portable office spaces with incredible acoustics and easy installation. 100% freedom, 0% disturbances
The Original

STUDIOROCKS takes care of silence and offers you the freedom you need through our many years of expertise in sound controlling. Our booths are built of high performance sound isolating materials. We provide you with a two way sound isolation:
1. no external noise in the cabin and
2. inside conversations cannot be overheard from outside

Please see on our webpage the measurement reports for each product. Pleasant internal room acoustics are obtained thanks to special acoustic absorbers.

Music Heritage

Our booths achieve the highest sound isolation values in the market. They are the result of our 10 years of experience in the music and recording market where excellent sound isolation and absorption is a must. This is extremely beneficial for offices with noisy industrial surroundings.

STUDIOROCKS Office Solutions

OFFICE SOLUTIONS enables easy assembly and prevents sound from escaping between the panels.

Quick & easy to assemble

The Studiorocks sound isolation booths can be built in minutes and just as easily dismantled and relocated should the need arise.

Our booths are designed this way without compromising the booth’s excellent sound isolating properties thanks to the modular panels which are built of high performance sound isolating materials and can simply be slotted together.

The patented tongue-and-groove design enables easy assembly and prevents sound from escaping between the panels.

Design & flexibility

Appealing:
The proportions of our design look appealing. Our sound-controlled spaces serve as furniture which enrich and decorate your work environment.

Flexible:
Thanks to our patented modular system you can place the windows and doors in different positions on our booth and change their position later on. Besides our standard design in white (FOCUS booth), you can order our booths in all available RAL colours and have our phone booths as real eye catchers.

With our phone booths your investment is flexible since you can take the booths with you easily should the need to move arise. Also, our FOCUS SPACES can be made smaller or bigger since you can take the booths with you easily should the need to move arise.

Meeting spaces

Design the space you need.
Meeting spaces

100% freedom, 0% disturbances

Our working and meeting booths have the highest sound isolation on the market. Comfortable privacy for high concentration work, phone calls & video conferences, meetings and presentations.

Thanks to our long experience of specialising in sound proofing we offer you comfortable silence to focus on what matters. These booths have a special sound control glass door and stand on so-called silent blocks.

With our Focus Spaces and thanks to our modular sound proofed system you can design the meeting booth you need, add windows and doors, vary the height and size. And your investment is flexible since you can take the booths with you easily should the need to move arise. Also, our Focus Spaces can be made smaller or bigger time after you’ve bought them. You just add some bricks or take them away. Sizes: from 1.2 x 1.2 m up to 50 m² in steps of 30 cm.

Multiple configuration possibilities

Besides our standard configuration (see each product) there are many possibilities for designing the booth your way.

• Customizable colour inside and outside the booth (select from all RAL colours ralcolor.com)
• Branding options
• Add windows and doors
• Different window & door positions
• Seat options
• Wheelchair accessible doors with ramp
  - Sound isolated lacquered wood door: 91 cm. width, inside width 80 cm.
  - Frameless glass door with simple glass and magnet closing, 91 cm.
    width, inside width 80 cm. Lower sound isolation value
• Special coating: Special resistant acrylic surface for use at trade fairs and road shows with frequent assembly and disassembly
• ON AIR signal: Lights up to signal occupancy
• With a motion sensor
